

Herlambang Setiadi received the Sarjana Teknik (equivalent to B.Eng) degree in electrical engineering from Institut Teknologi Sepuluh Nopember, Surabaya, Indonesia and M.Sc in electrical power and control engineering from Liverpool John Moores University in 2014 and 2015, respectively. Furthermore, he received his Doctoral degree from The University of Queensland Australia, majors in Electrical Engineering in 2019. Currently, he is a lecturer at Universitas Airlangga Indonesia. His research interest includes small signal stability in power systems, renewable energy integration, battery energy storage systems, power system stabilizer and metaheuristic algorithm. The Author can be contacted at herlambang.setiadi@vokasi.unair.ac.id.

Nadarajah Mithulananthan (Mithulan) received his Ph.D. from University of Waterloo, Canada in Electrical and Computer Engineering in 2002. He worked as an electrical engineer at Generation Planning Branch of Ceylon Electricity Board in Sri Lanka and as a research leader at Chulalongkorn University, Bangkok, Thailand. Dr. Mithulan is currently an associate professor at University of Queensland. He also served as the coordinator of energy field of study and director of regional energy resource information center (RERIC) at Asian Institute of Technology, Bangkok, Thailand. His main research interests are voltage stability and oscillation studies on practical power systems, application of FACTS controller, EV and renewable energy integration into power systems. The Author can be contacted at mithulan@itee.uq.edu.au.

Awan Uji Krismanto was born in Malang, Indonesia. He completed his B.Sc. and M.Sc. in Electrical Engineering from Brawijaya University and Sepuluh Nopember Institute of Technology (ITS), Indonesia in 2004 and 2010 respectively, and the Ph.D. degree in electrical engineering from The University of Queensland, Brisbane, Australia, in 2018. Currently, He is a faculty member in the Department of Electrical Engineering National Institute of Technology (ITN) Malang, Indonesia from 2005. His research interests include microgrid, smart grid, power system stability, distributed generation, power electronic and power quality. The author can be contacted at awan_uji_krismanto@lecturer.itn.ac.id.

Innocent Kamwa received the B.S. and Ph.D. degrees in electrical engineering from Laval University, Québec City, QC, Canada, in 1985 and 1989, respectively. He has been a research scientist and a registered professional engineer with Hydro-Québec Research Institute (IREQ), Varennes, QC, Canada, since 1988, specializing in system dynamics, power grid control, and electric machines. After leading system automation and control R&D program for years, he became a chief scientist for smart grid, the head of power system and mathematics, and the acting scientific director of IREQ in 2016. He currently head of the power system simulation and evolution division, overseeing the Hydro-Québec Network Simulation Centre known worldwide. He is an Adjunct professor with Laval University and McGill University. The Author can be contacted at kamwa.innocent@ireq.ca.
