

*Conference on Intelligent Techniques in Control, Optimization and Signal Processing (INCOS). IEEE, 2017.*

- [19]. Al-Tameemi, Zaid H., et al. "Optimal Sizing and Location of DG Units for Enhancing Voltage Profile and Minimizing Real Power Losses in the Radial Power Systems Based on PSO Technique." *IOP Conference Series: Materials Science and Engineering. Vol. 518. No. 4. IOP Publishing, 2019.*

**Yayehyirad Ayalew Awoke** was born in Debre Markos, Ethiopia in December 19, 1991. He obtained his B.Sc. Degree from Debre Markos University in Electrical and computer Engineering in July 03, 2014, and he gained M.Sc. Degree in Power systems Engineering from Bahir Dar University in March 14, 2019. He also has earned certificates on solar power, smart grid and renewable energy, etc. Currently, He is a lecturer in School of Electrical and Computer Engineering in Debre Markos Institute of Technology in Debre Markos University. His current research interests are power system

optimizations, smart grid, renewable energy technology, and distribution network power quality and reliability.

**Takele Ferede Agajie** was born in Dangila, Ethiopia in January 29, 1991. He obtained his B.Sc. Degree from Debre Markos University in Electrical and computer Engineering in July 03, 2014, and I gained my M.Sc. Degree from Hawassa University in November 19, 2019 in Power system and Energy Engineering. And He has earned certificates on solar power, smart grid and renewable energy, etc. Currently I am a lecturer in School of Electrical and Computer Engineering in Debre Markos Institute of Technology in Debre Markos University. His research interests include renewable energy

technology, distribution network power quality and artificial intelligent optimization techniques.

**Engidaw Abel Hailu** was born in Ethiopia in 1986. He obtained B.Sc. in Electrical Engineering from Bahir Dar University in 2009, and he gained M.Sc. degree in Electrical Power Engineering from Arba Minch University in 2012. He has published five papers in areas of renewable energy, energy efficiency, distributed generation. Currently, he is working as Assistant Professor in Debre Markos University and his research interests are renewable energy technologies, energy efficiency, distributed generation, smart grid, power electronics and drives.
